Mizar

Defi Platform

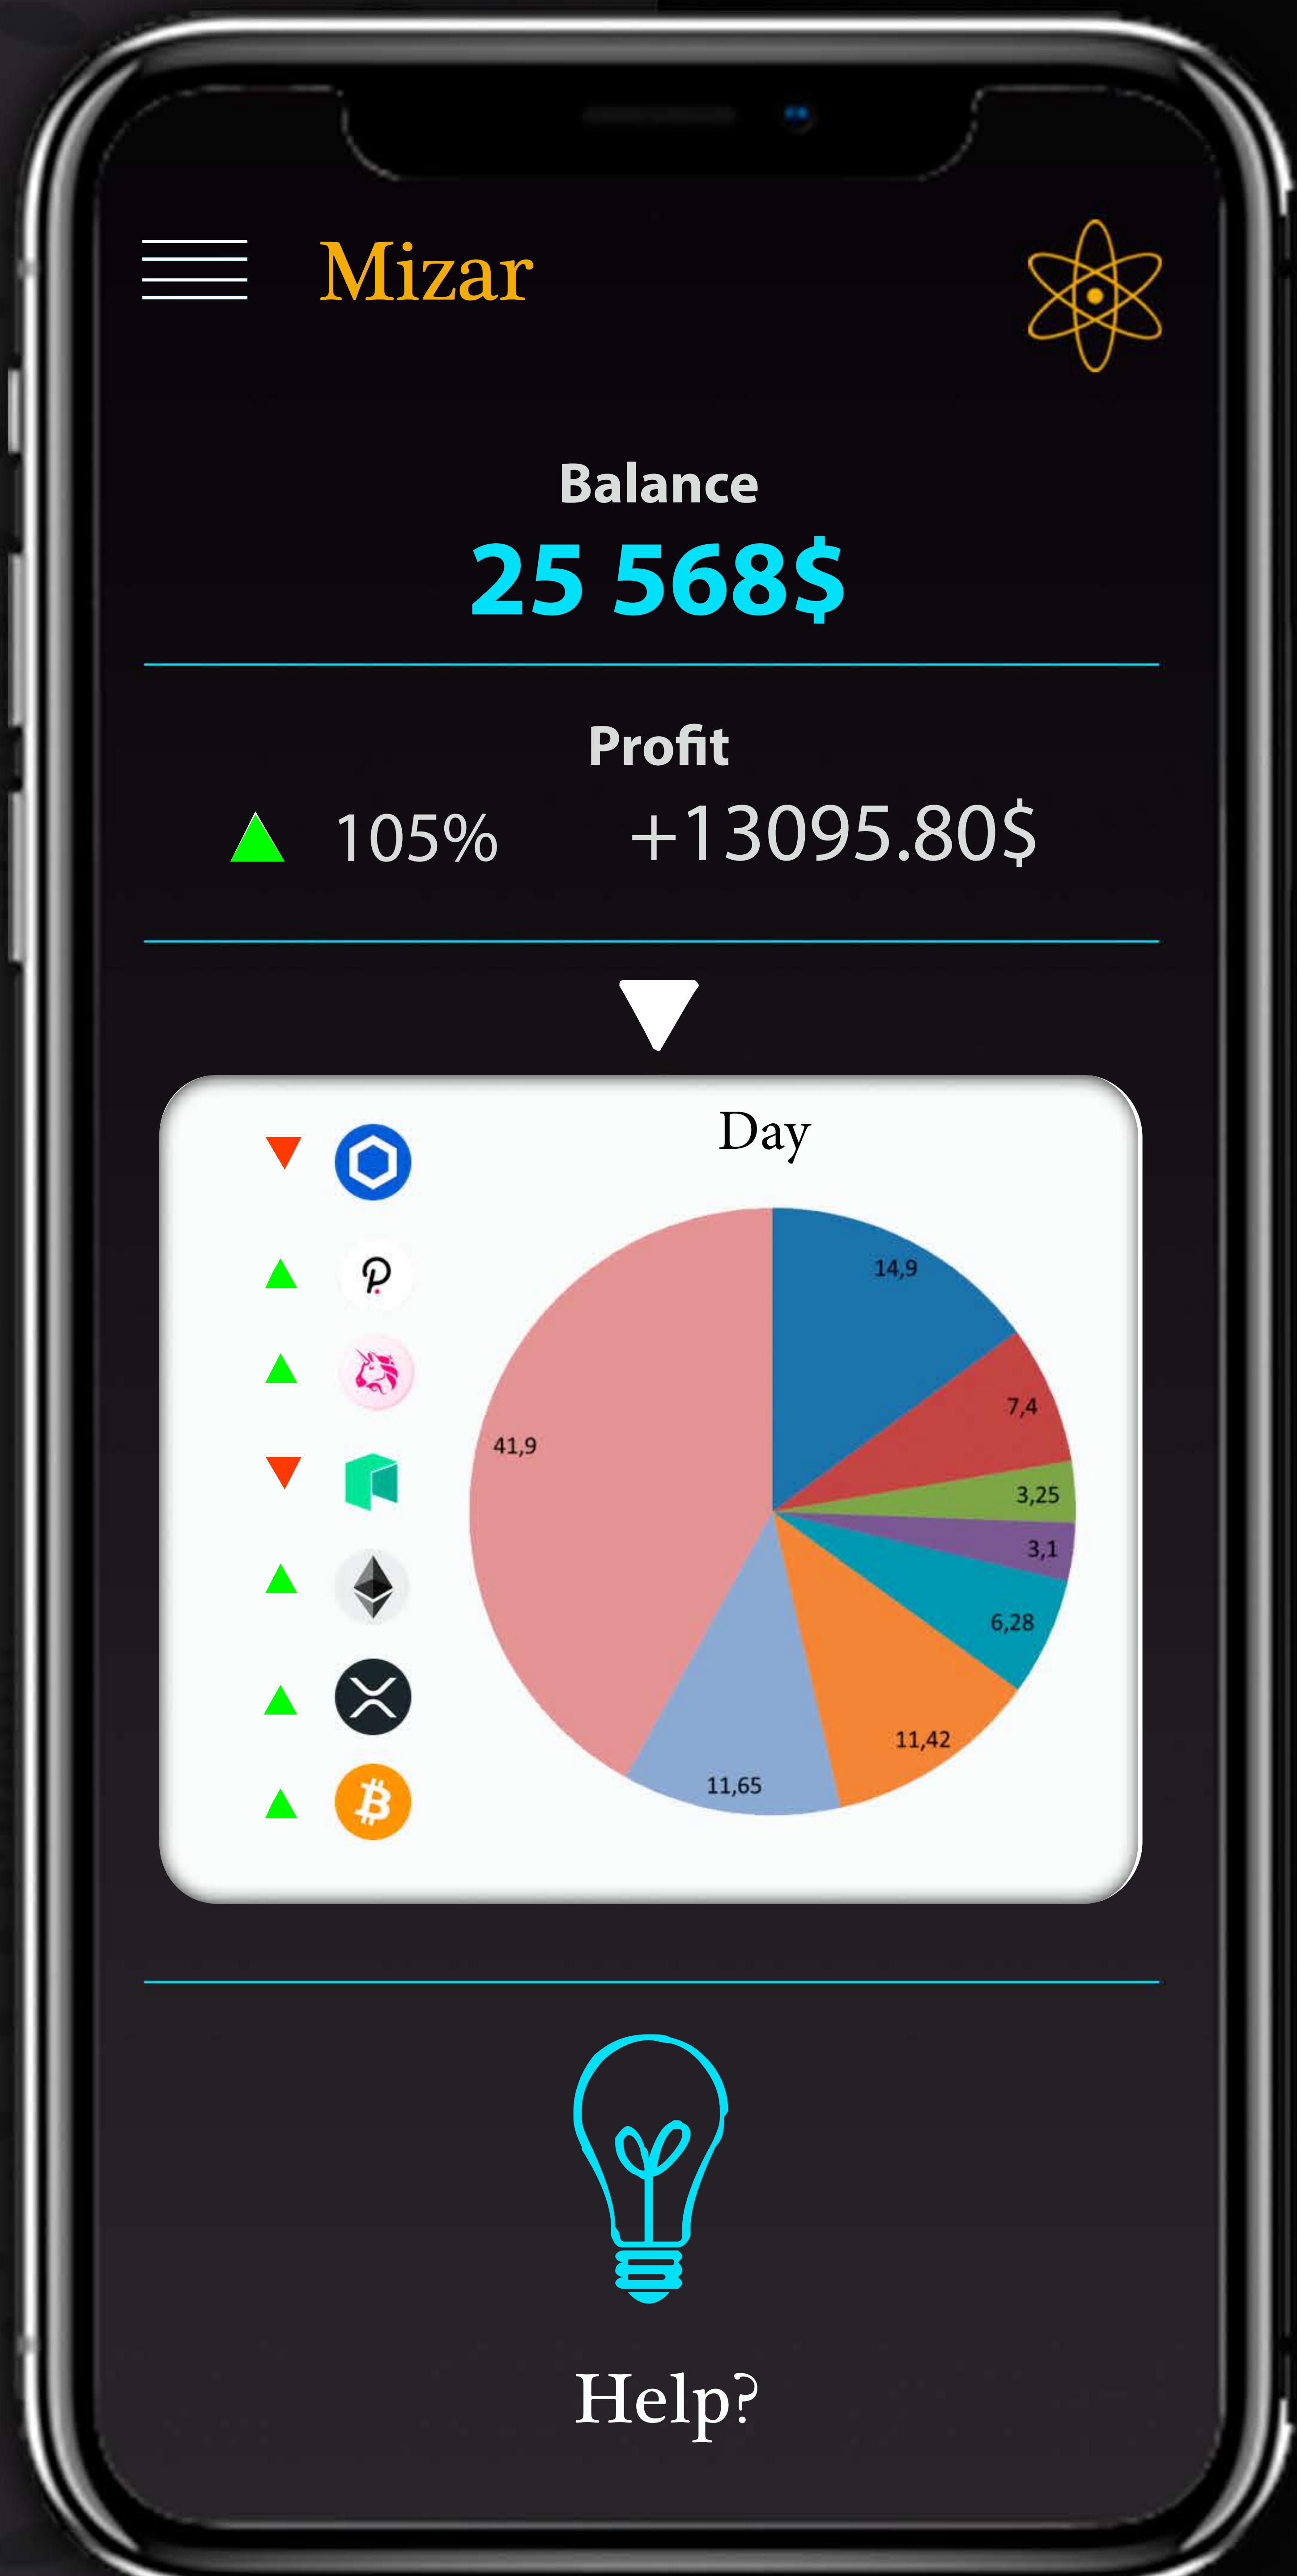

## Mizar App

### Optimization of profitability

Mizar is a universal platform that allows anyone to easily access the profitability of the cryptocurrency markets, while leaving you in complete control of their funds.

In one application, you get the opportunity to easily buy, exchange cryptocurrencies, access market and other instruments using our help.

The application is a UX / UI interface that runs on the Mizar token

## Mizar Algorithm

### Algorithm for increasing profitability

The algorithm developed by our team allows everyone, with minimal knowledge, to get simplified access to the profitability of cryptocurrency markets, reduce risks, carry out dynamic portfolio management, protect, hedge positions using related instruments, and reduce commissions in the form of compensation with the Mizar token.

Mizar automates interactions with the markets using the parameters you choose

# Mizar App

Connects you to the real market. Using the algorithms of the application, our recommendations and communication with the community, you can optimize your portfolio and transactions.

Benefit from the best market rates and the greatest liquidity. Instant market access. Get access to every blockchain and reward pool in one place.

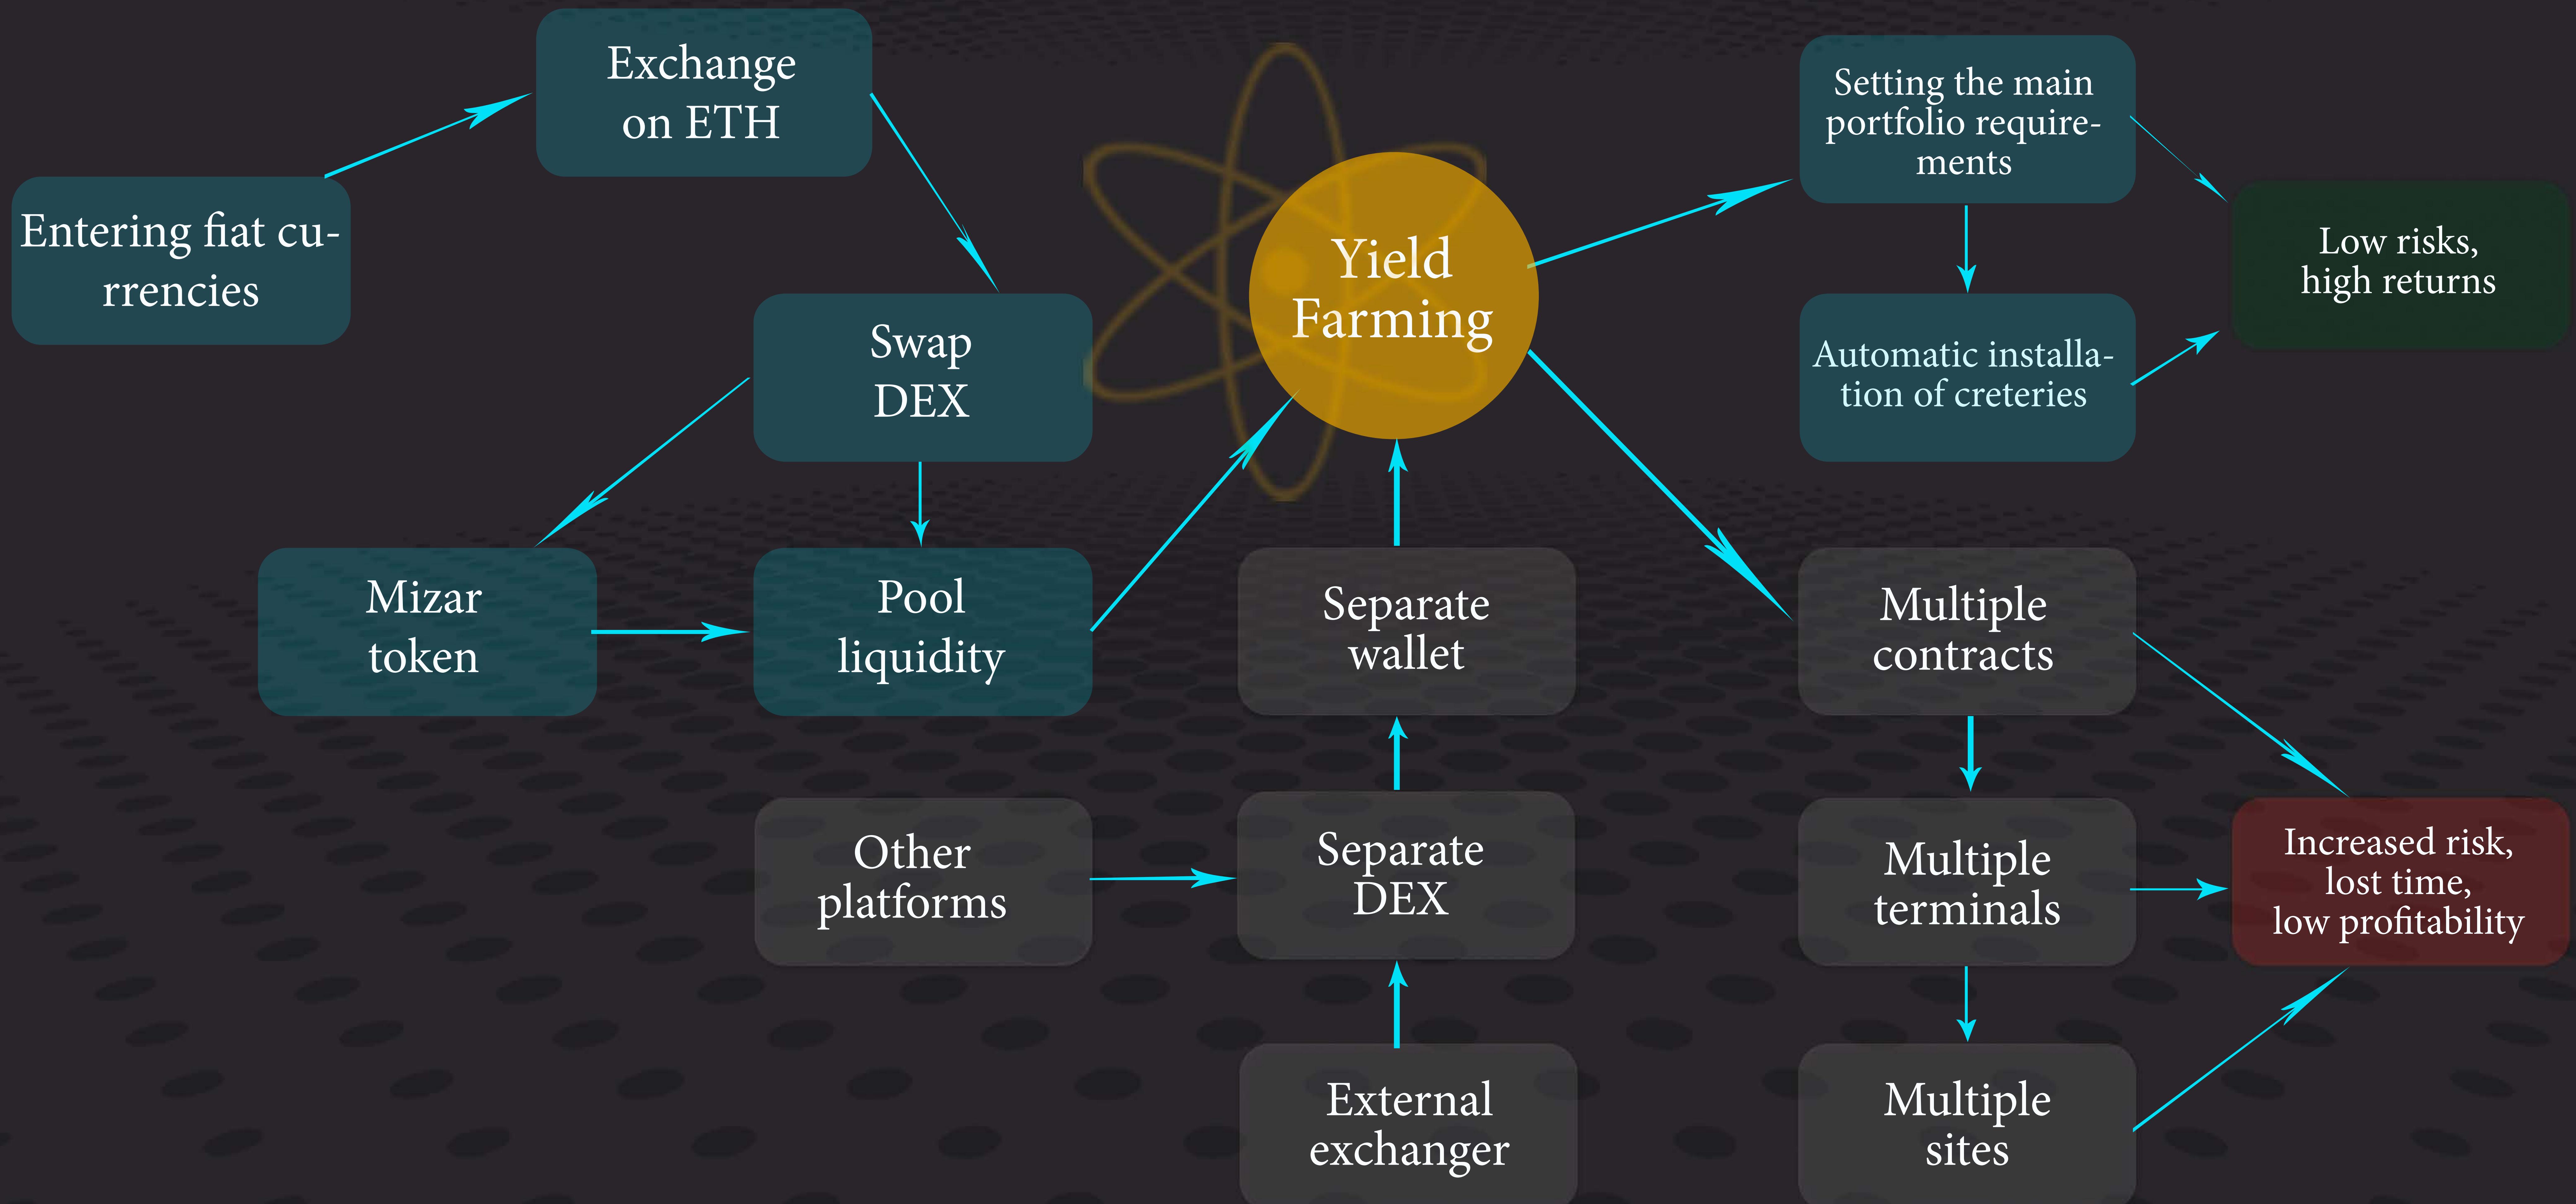

Swap> Farm> Harvest> Store  
with a complete set of tools saves you time and  
money. Share your progress with others with one  
touch.

The best data available to improve productivity.  
Market analysis. Collecting blockchain data.  
DeFi statistics, market analysis, live streaming,  
portfolio management, DEX integration.

# Mizar Algorithm

Mizar builds its algorithm based on the experience of successful projects in the field of decentralized finance. By implementing a set of user-centric features in our smart contracts, we ensure the high value of the application as well as the value of the Mizar token on the network.

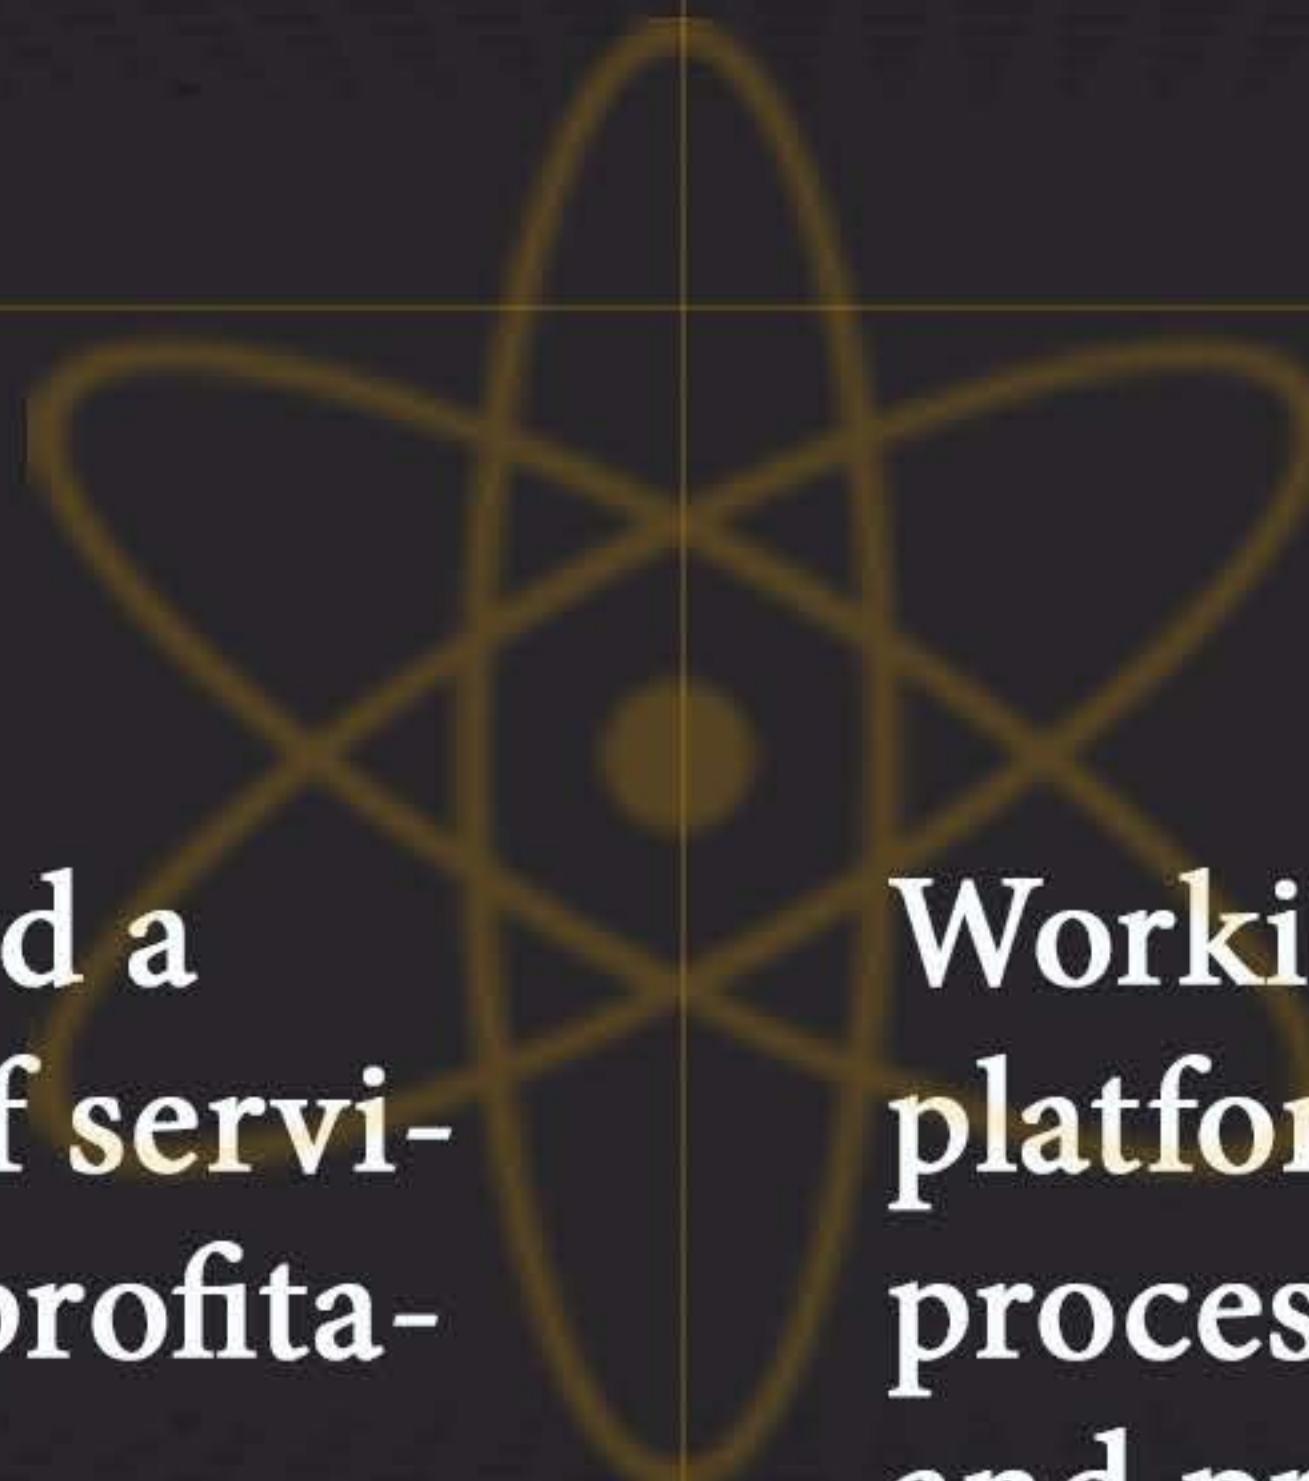

## User Problems

Most of the cryptocurrency services do not have their own application (only the website).  
Or they have limited functionality.

Users are offered a huge number of services, which are profitable and honest enough to choose from.

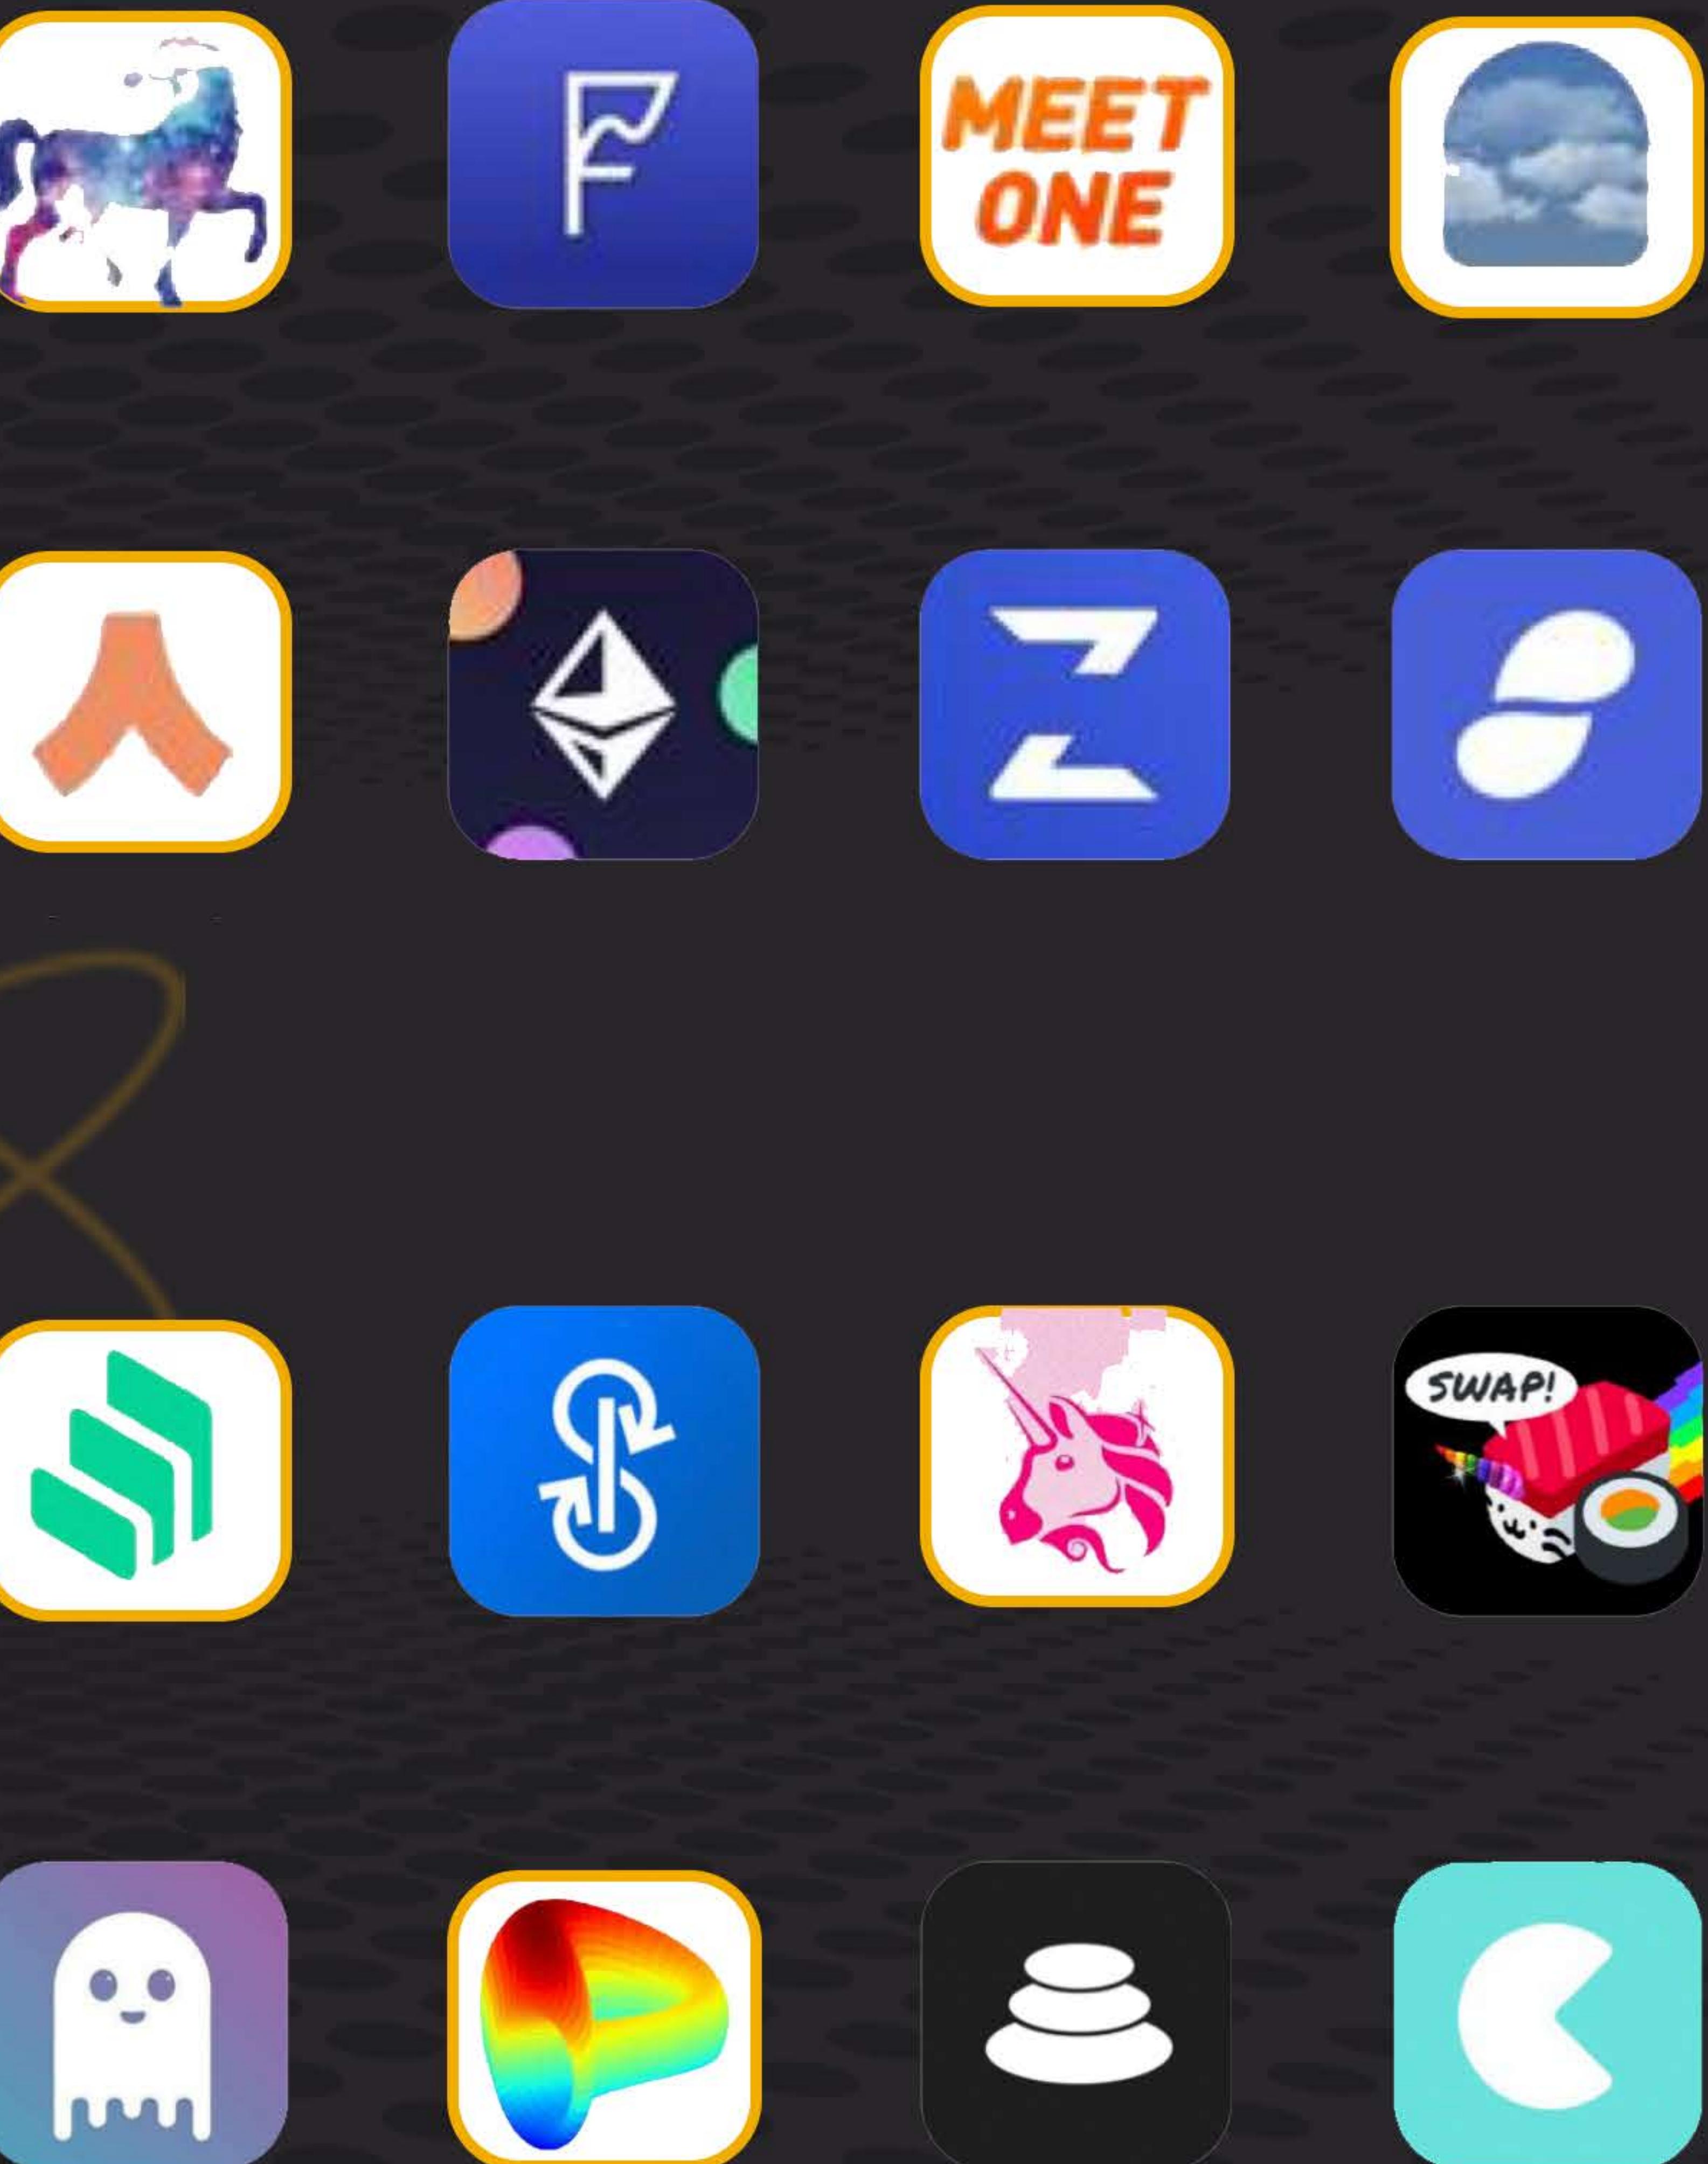

Working on different platforms makes the process of collecting and processing data time-consuming and laborious, which significantly slows down the speed of decision-making.

Users lose a lot of money on numerous commissions, while the size of the commission is not always clear and transparent.

## The Application

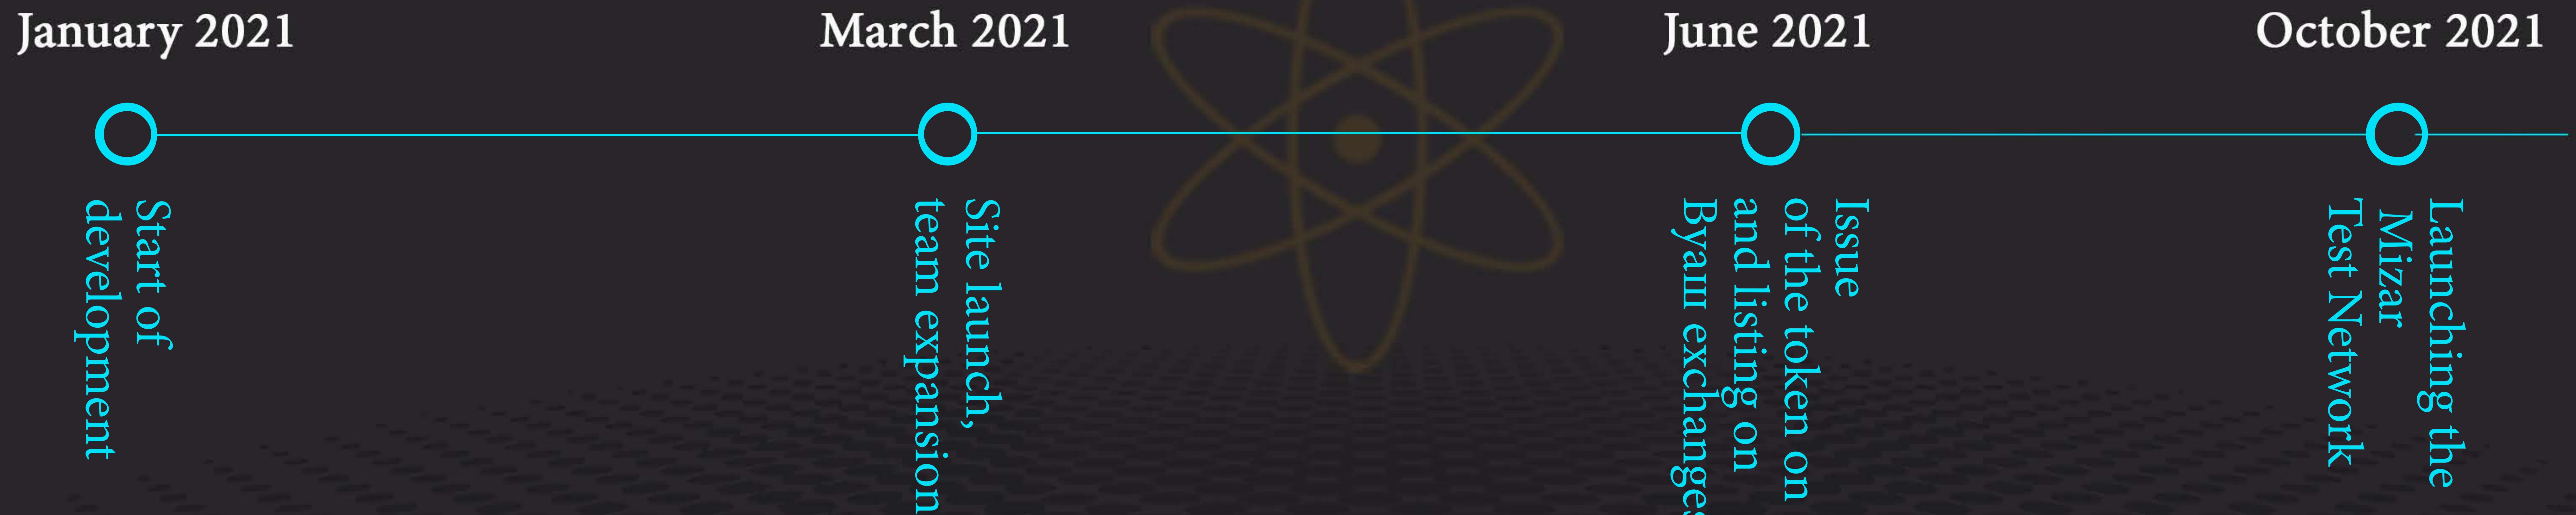

Current applications are poor and tend to have limited capabilities with one or two main functions. Of all our research and testing, none come close to a premium user experience. Wallets are too simple, and market data processing applications have no added value. There are no all-in-one suppliers.

## The Algorithm

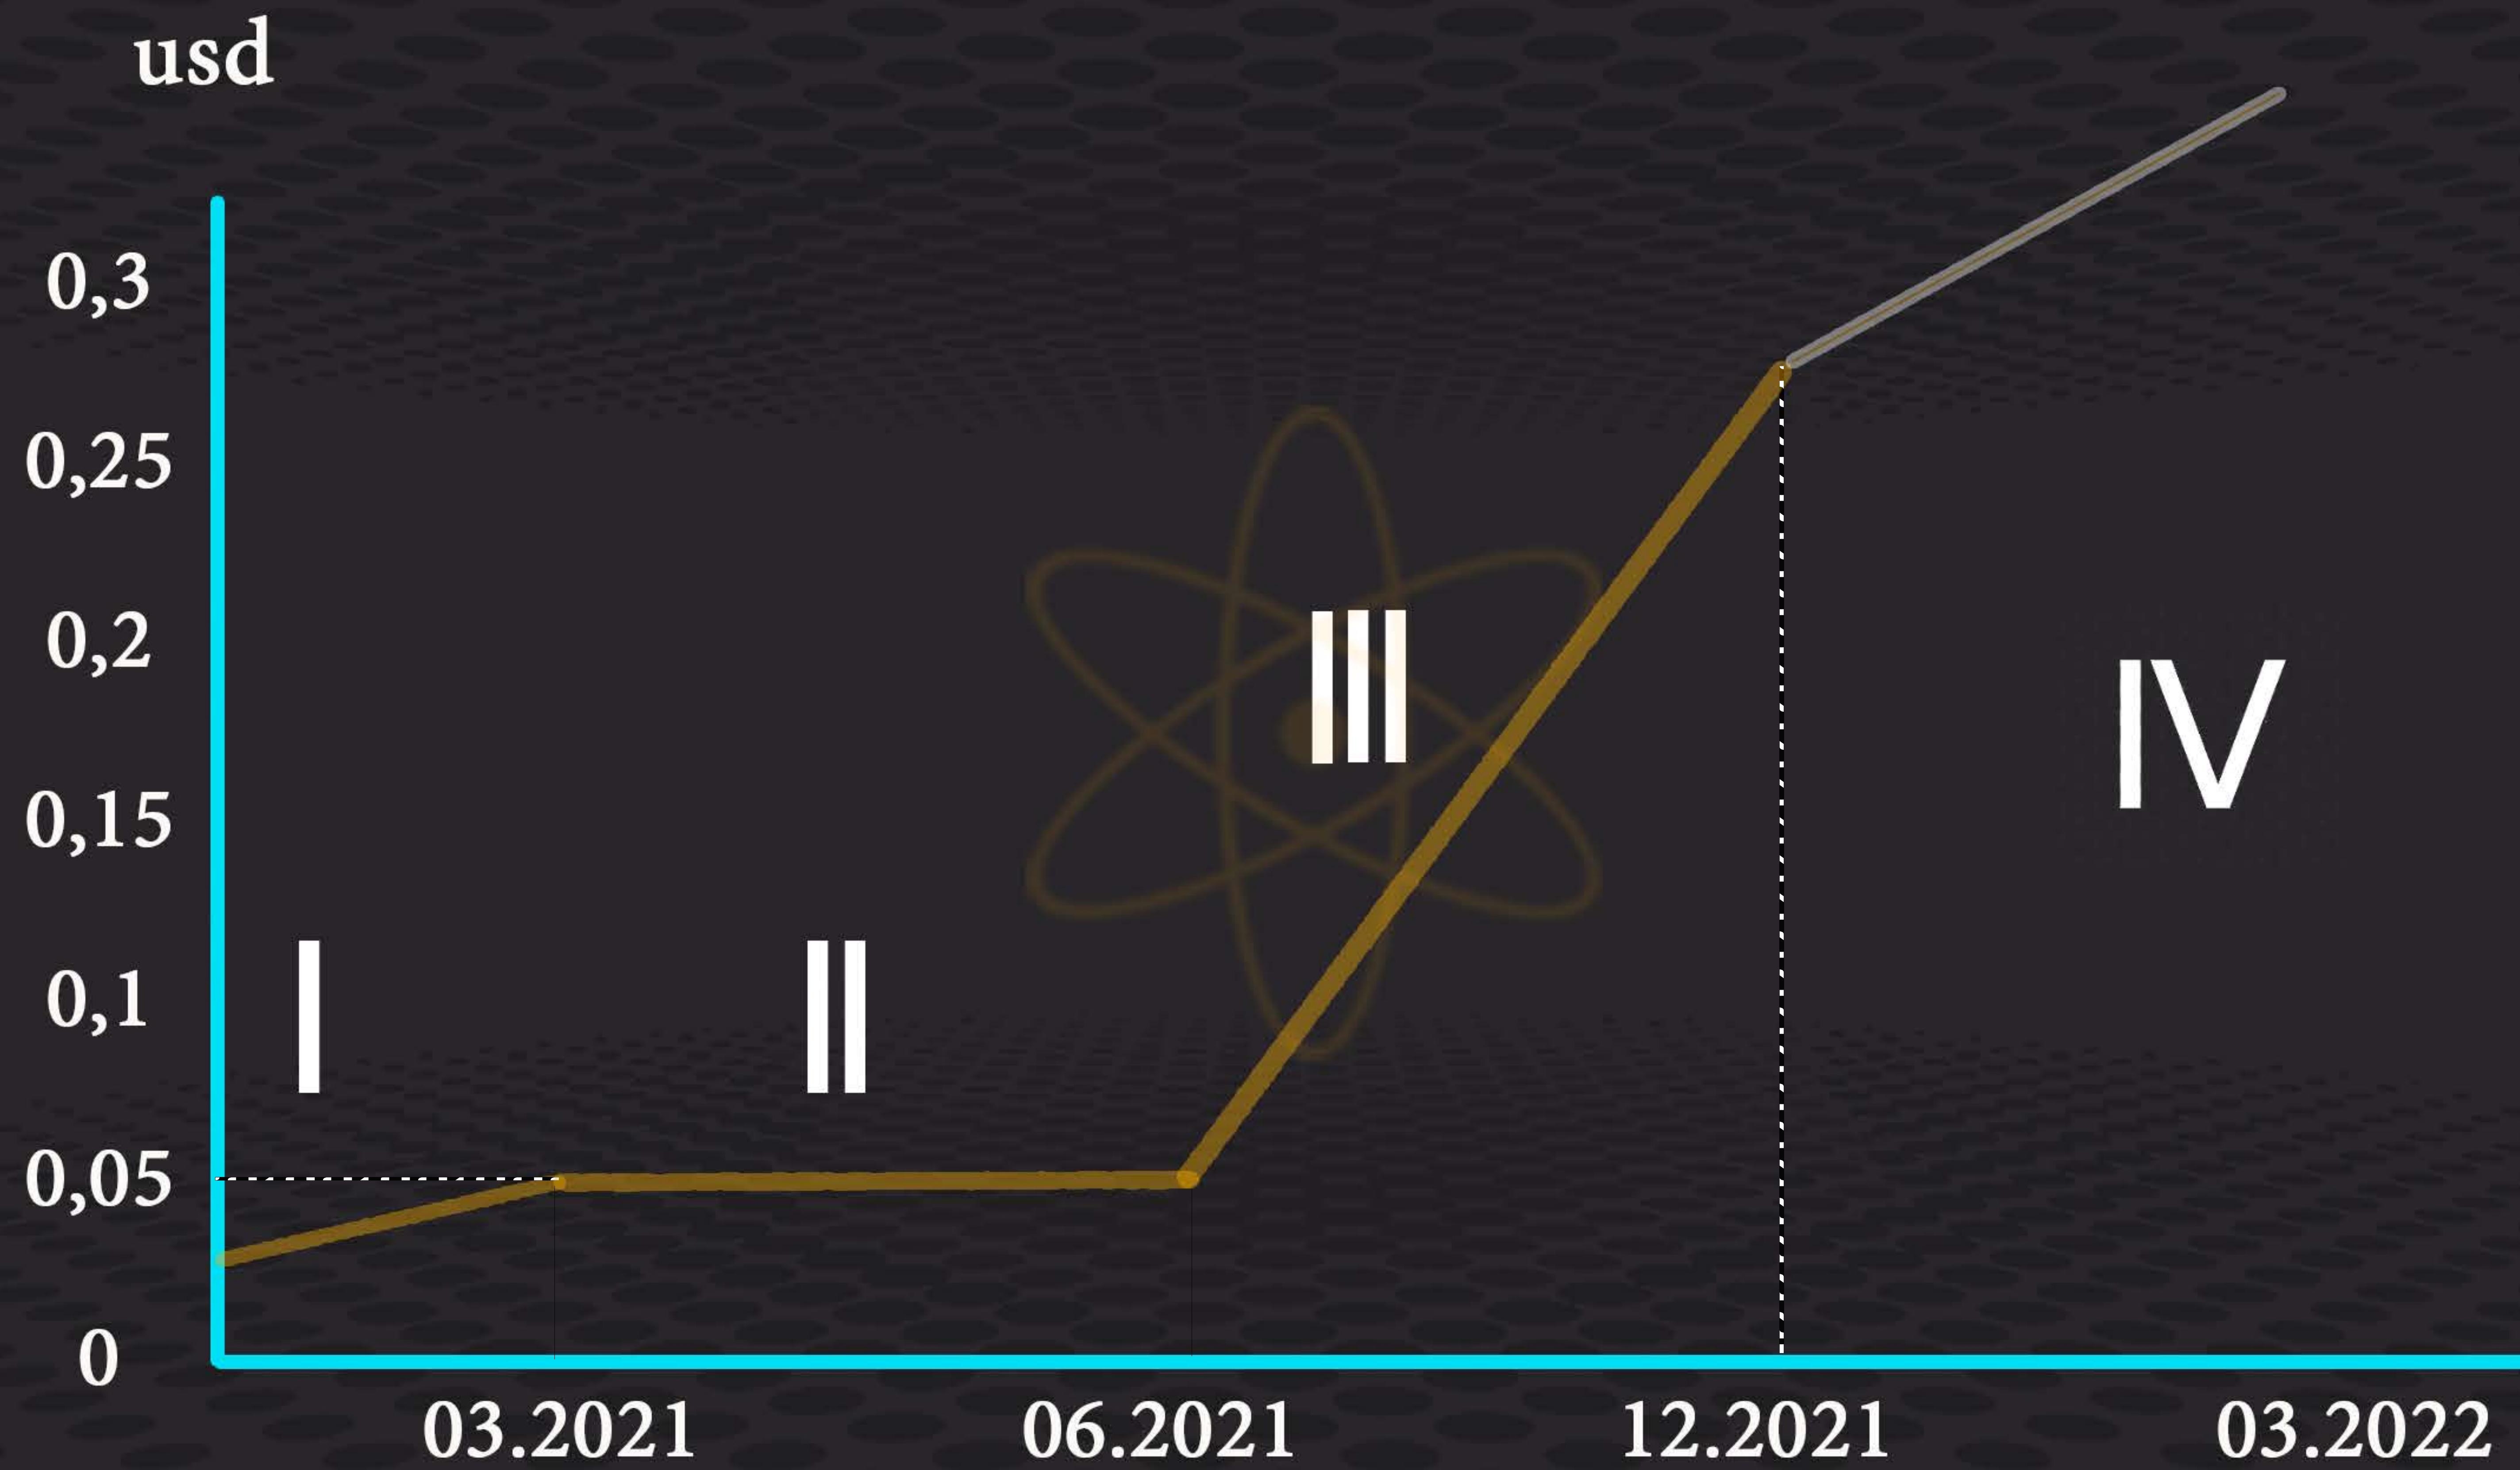

The current yield algorithms are also very selective in what they offer. We have an example of a good protocol with one function, but there is no good platform to use it. Protocols also tend to be fragmented and fail to capture all the value available in the market. This leaves a gap in the market for the protocol to fill.

# Road Map

\*The timing of the next stages depends on the development timeline and will be announced in August 2021

## Mizar Token Placement Schedule

Stage 1 - Private distribution of tokens to investors. Price for 1 MIZ is from 0.03 to 0.05 usd.

Stage 2 - White list. Price for 1 MIZ - 0.05 usd.

Stage 3 - Placement on Uni Swap. Price for 1 MIZ - 0.05 usd.

Stage 4 - Placing on other exchanges (Binance and other exchanges)

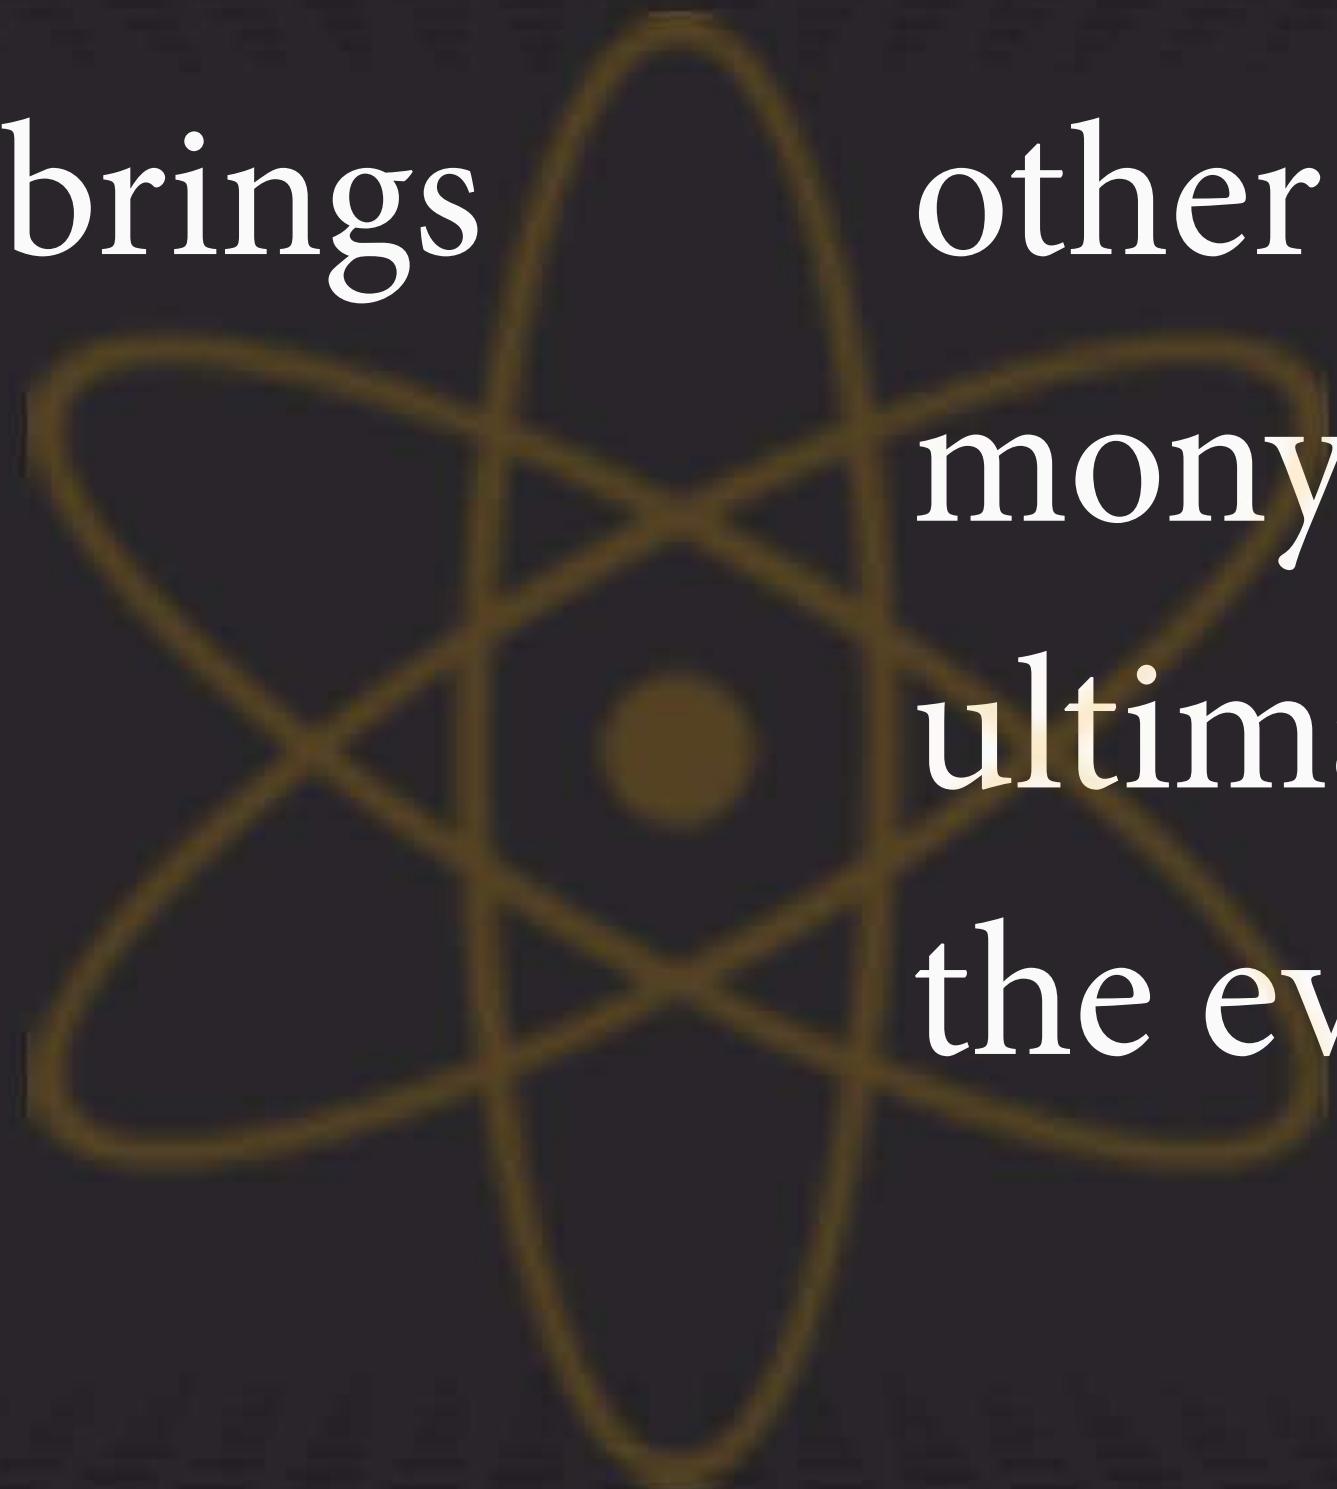

## Mizar Technology

### Mizar App

Mizar is open to integrating leading projects from the Defi world and beyond. Our goal is to use the best technologies available and overlay them on a beautiful user interface. Our team collects the best technologies available and brings them to our platform.

### Mizar Algorithm

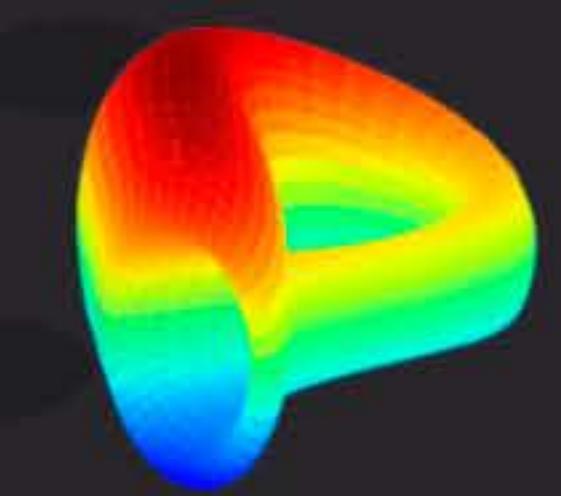

Mizar is building an ecosystem of custom services. The algorithm allows us to implement any developing blockchain service. Our wide network allows us to open doors to work with other reputable projects. Building network harmony, interacting with big minds in finance. The ultimate goal is to keep the project in step with the evolving world of Defi.

**Chainlink**

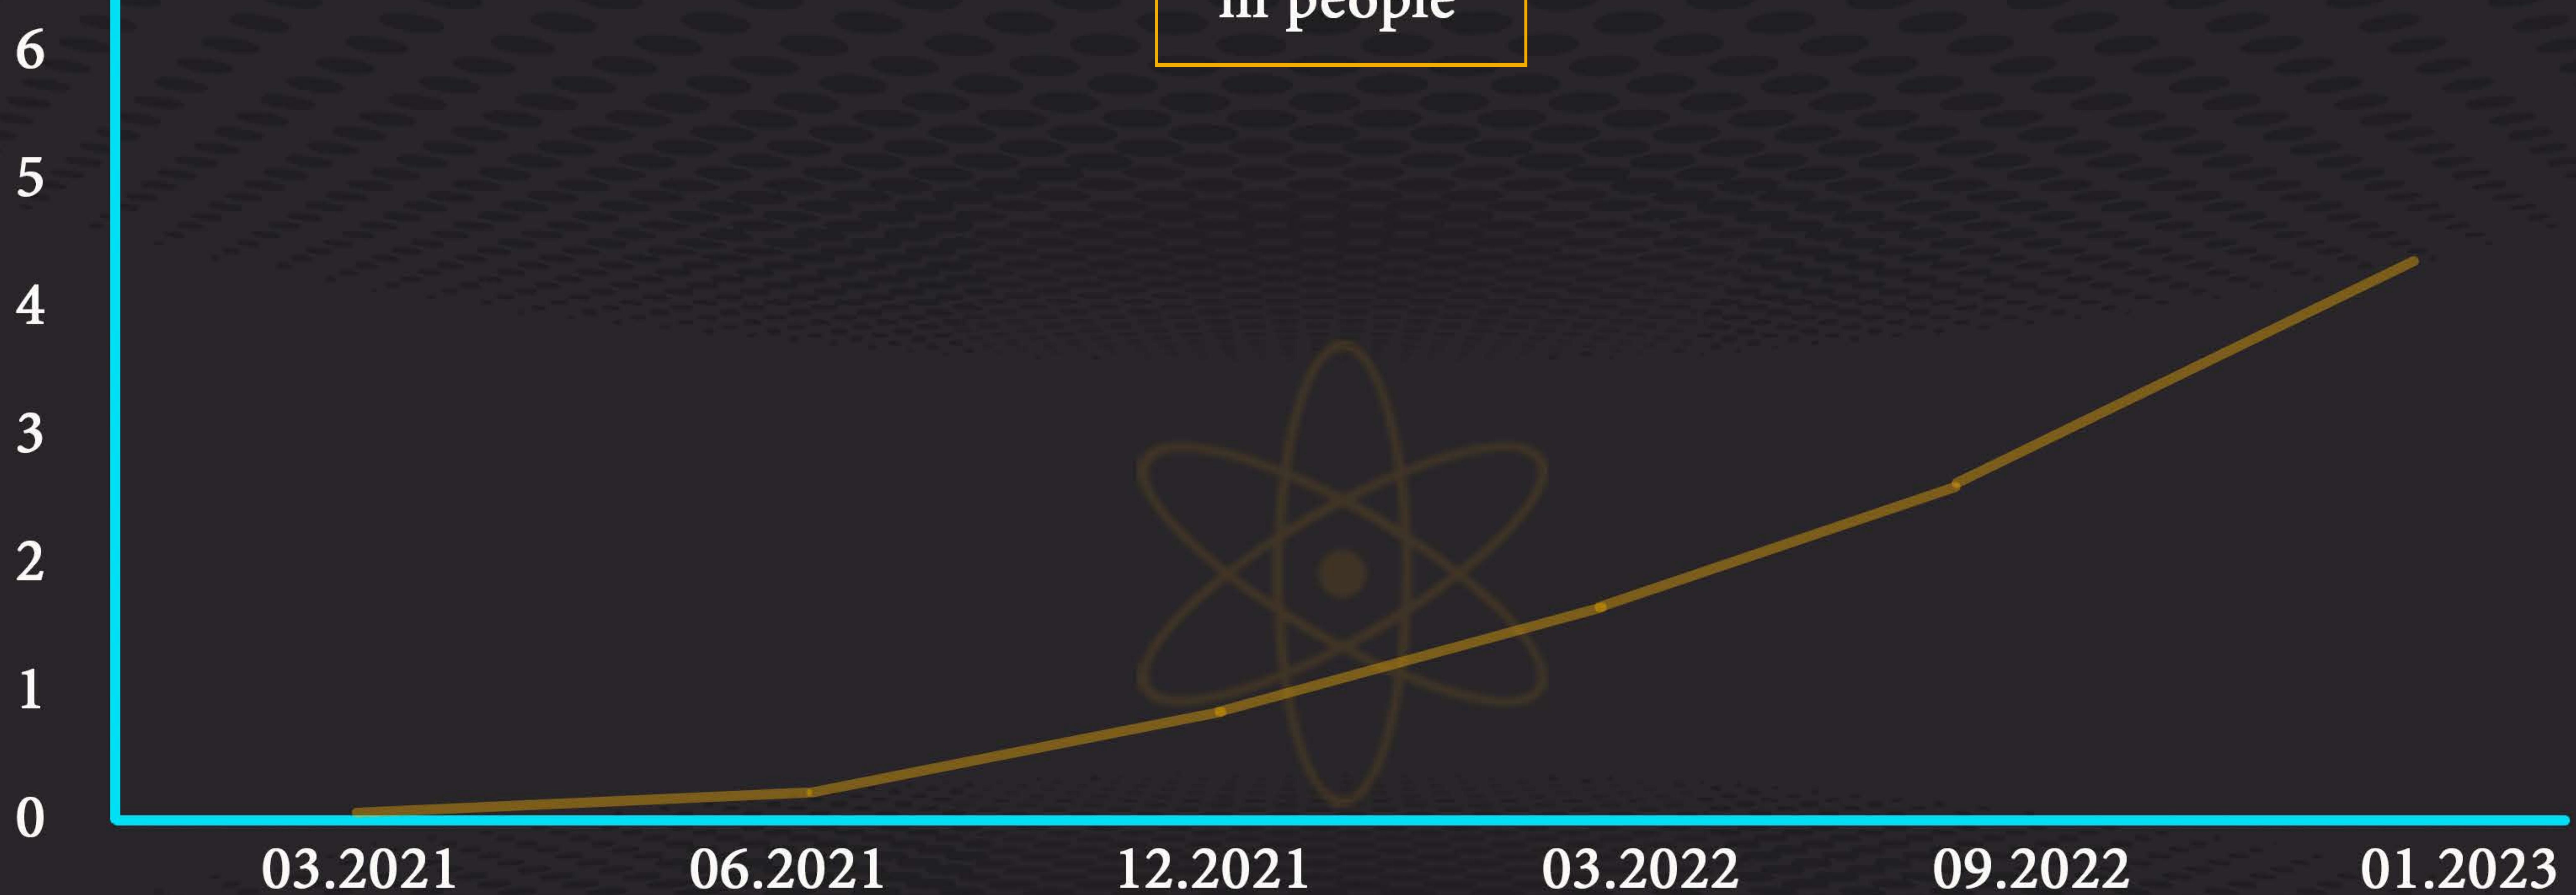

**Compound**

**Curve**

## The Users

m people

Our initial audience is a global community of crypto enthusiasts, users who support new beginnings in the crypto industry

The geography of users covers Russia, EU countries, Canada and other countries

Further development will take place in accordance with the changes and strictly in accordance with the legislation of the countries in relation to cryptocurrency

# The Team

**Pavel D**  
promotion, advertising, branding

Marketing  
Russia

**Matin**  
investors, partnership, development of communications

Partnerships  
UK

**Dmitriy B**  
HTML, web, design

Web

## Mizar token distribution

The Mizar token powers the entire ecosystem. Our economists have developed a plan for the distribution of tokens for 2 years, in such a way as to ensure a sustainable growth in the value of the coin and create demand from users. Due to the constant increase in the number of users and a limited number of tokens, its value will grow.

12,000,000	Private Sale	12%	Early investors
3,000,000	Liquidity reserve	3%	Uniswap Pool
15,000,000	Future sales	15%	Venture Investors
10,000,000	The Team	10%	Team reward
15,000,000	Marketing / Airdrop	15%	Community expansion
15,000,000	Rewards	15%	App Rewards
10,000,000	Consultants	10%	Consulting
10,000,000	Awards	10%	Developer Awards
10,000,000	Reserve	10%	Launch of new projects

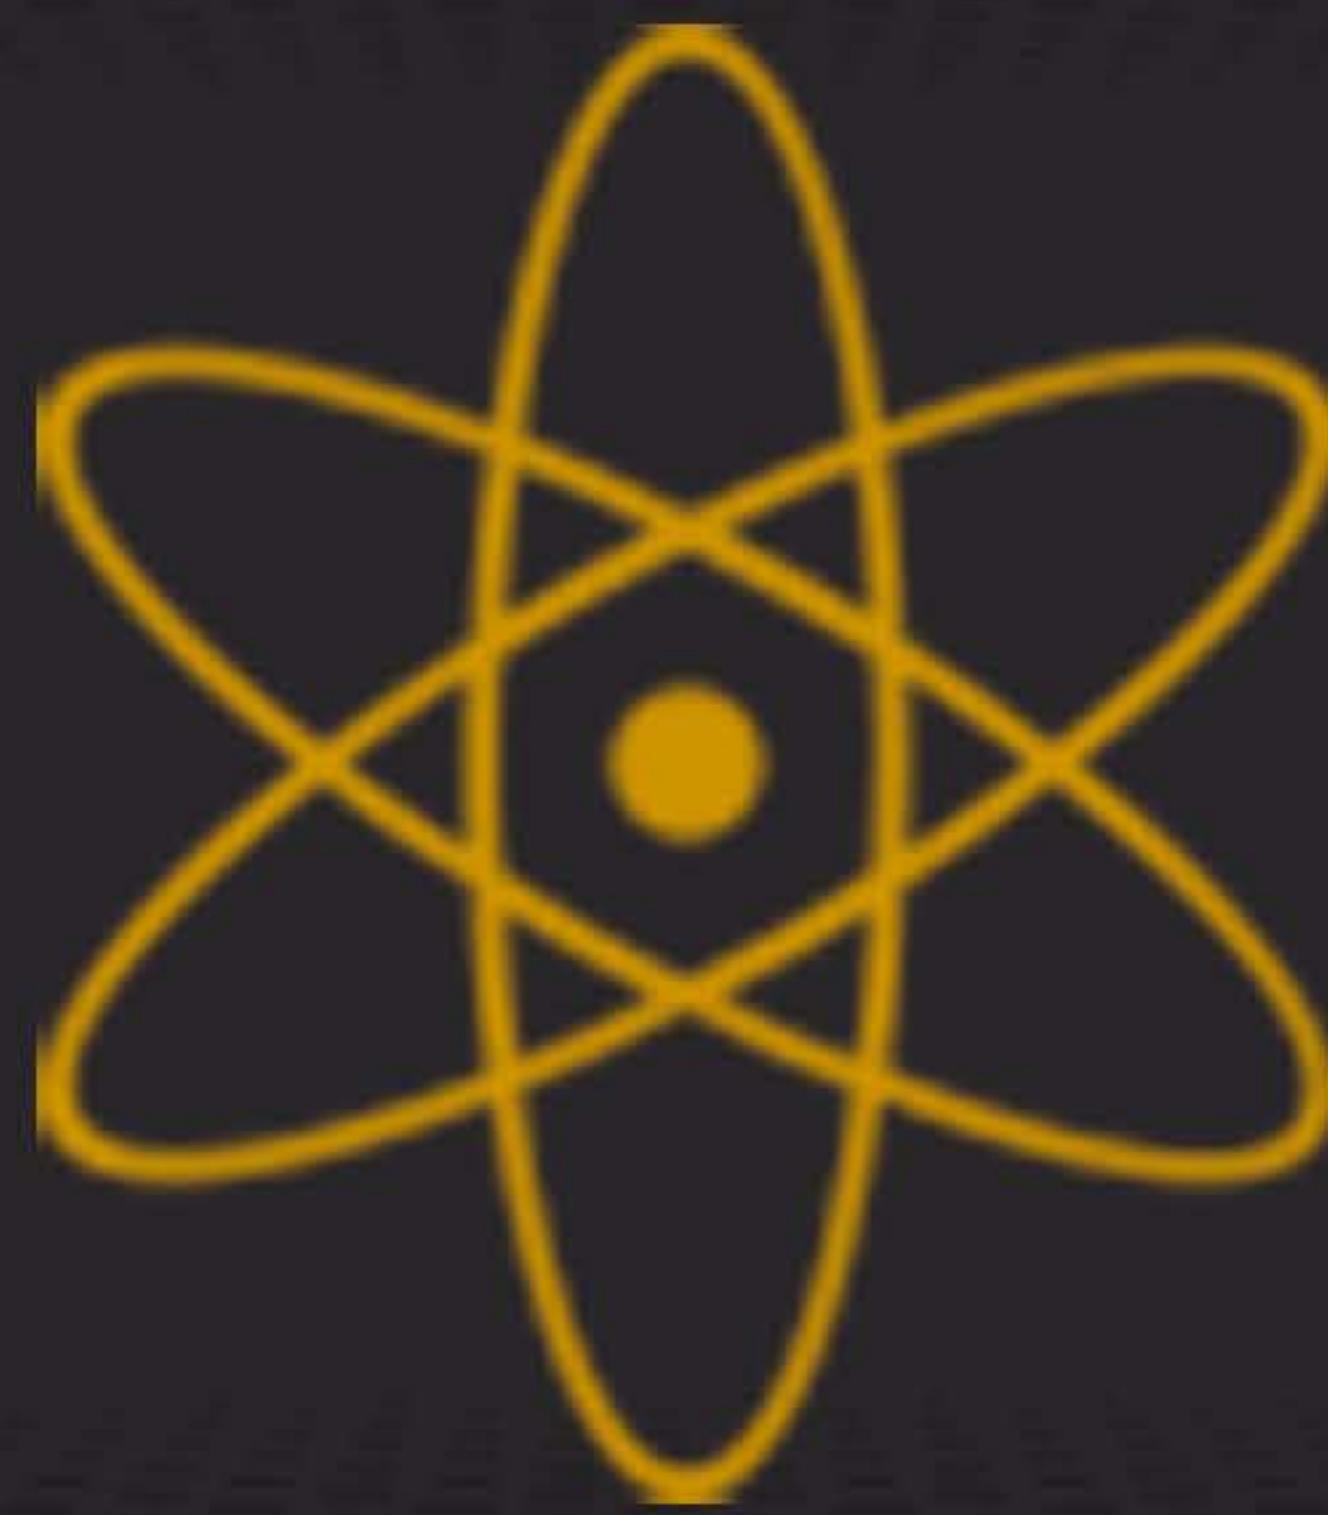

100,000,000 Max Supply

Closed sales:  
12,000,000 tokens

Reducing supply due to deflation of  
tokens in the protocol.
